

# BHIDD Program

## Background

The behavioral health and intellectual/developmental disability (BHIDD) community **residential programs** integrate services in a personalized way by combining:

- Behavioral Health services
- Developmental Disabilities services
- Positive Behavior Support (rooted in Applied Behavior Analysis)
- Community Resources

Services are offered across a continuum of care with enhanced coordination, ensuring support is consistently provided, regardless of the individual's residence.

## Locations

# Referral Process

BHIDD referrals are prioritized by the Department of Mental Health (DMH) to ensure that those with the most urgent needs are granted access first due to limited capacity.

- The individual's planning team submits the completed BHIDD referral forms to [SCSpecialistConsult@dmh.mo.gov](mailto:SCSpecialistConsult@dmh.mo.gov).
- DMH staff notify the planning team about eligibility for the BHIDD program.
- Eligible referrals are entered into CareManager.
- BHIDD Program providers assess the individual's support needs.
- If a provider accepts the referral, they begin planning with the individual's team.
- If provider cannot accept the referral, they document the reason.

For all community residential programs (not HARP), individuals must first be active on DD's Consumer Referral Database. If the individual is not already on the CRD start here:

<https://dmh.mo.gov/dev-disabilities/community-transitions>

**HARP referrals can be made by emailing**  
[caremanager@mobhc.org](mailto:caremanager@mobhc.org)

# Program Highlights

## Beacon Specialized Living

BSL Crisis Residential Program offers intensive support for individuals receiving **ISL** service. The multidisciplinary team approach of staff, licensed behavior analysts, registered nurses, and registered behavior technicians help individuals build essential life skills, improve communication, and reduce challenging behaviors to promote stability, independence, and successful community integration.

## Behavior Intervention Services

BIS program supports individuals with complex behavioral needs through intensive behavior therapy and **ISL** services. The program focuses on direct applied behavior analysis therapy, delivered by a highly trained team of board-certified behavior analysts, registered behavior technicians, and direct support professionals working collaboratively for skill development, behavior management, and individualized support to empower individuals to achieve long-term success.

## Clark Center

The Clark Community Mental Health Center offers **I-CPR** services within their newly established one-bedroom tiny home (**clustered apartments**) setting. Residents living in this setting must be able to perform daily living skills like cooking and showering without assistance. Staff are not on the premises 24/7, but residents will have quick access to staff 24 hours a day, 365 days a year. This setting is intended to be the final step taken before one achieves full independent living.

## Compass

Compass' **ITRH** is a community-based clinical treatment model with an integrated treatment team designed to prepare the individual with complex needs for full or partial reintegration into the community. This setting is intended for temporary (less than 12 months) support for achieving a successful transition to a less restrictive setting.

## Easterseals Midwest

The Easterseals Midwest program offers **ISL** services designed to support individuals with complex needs by focusing on whole-person, trauma-informed care that is dynamic, matching intensity with the person's changing needs. The program uses applied behavior services and partners with Swope Health to emphasize building rapport, trust, and shared goals and intensive skills training to empower individuals to take an active role in their treatment and personal development.

## Fulton State Hospital-HARP

Hearnes Acute Rehabilitation Program (HARP) provides stabilization and skills development for individuals with developmental disabilities who are experiencing acute psychiatric symptoms. Individuals will have a short length of stay and will return to the community once ready for discharge.

## Family Counseling Center

FFCC's BHIDD program offers person-centered services in its newly established **PISL** and **IRTS** setting. The focus is on individual needs, strengths, and preferences. A multidisciplinary team works together to provide comprehensive and holistic care, promoting self-determination, autonomy, and empowerment. This approach aims to help individuals build self-esteem, confidence, and independence.

## Missouri MENTOR

The Missouri MENTOR program offers **ISL** and **Host Home** services designed to support individuals in the community in building the skills and independence to live a full, joyful life of their own choosing. Individuals are supported by a team of staff to help the individual live a full and independent life.

## Swope Health

The Swope Health program offers services in an **IRTS** setting. The program offers clinical staff trained in behavior analysis and evidence-based practices to support individuals with complex needs. The program focuses on activities to promote wellness and recovery with a goal to improve independence for all residents.

## The Arc of the Ozarks

The Arc of the Ozarks provides comprehensive supports to individuals receiving **ISL** with non-preferred challenging behavior. The Arc of the Ozarks utilizes a multi-disciplinary person-centered approach to treatment, which includes applied behavior analysis, trauma-informed care, therapy, psychiatry, and other research-based approaches. Acute crisis services are designed to provide evaluation and stabilization services based on the specific behavioral and medical presentation of the individual referred for services.

**ISL= INDIVIDUALIZED SUPPORTED LIVING | ITRH= INTENSIVE THERAPEUTIC RESIDENTIAL HABILITATION**  
**IRTS= INTENSIVE RESIDENTIAL TREATMENT SETTING | PISL= PSYCHIATRIC INDIVIDUALIZED SUPPORTED LIVING**
