

# Statewide Summit on Missouri's Sequential Intercept Model Collaboration Project

POLICY RESEARCH ASSOCIATES

May 2025

Prepared by: Policy Research Associates, Inc. Ashley Krider, MS, and Travis Parker, MS, LIMHP, CPC

## ACKNOWLEDGMENTS

This report was prepared by Ashley Krider and Travis Parker of Policy Research Associates, Inc. Policy Research Associates wishes to thank the Missouri Behavioral Health Council for hosting the Summit and KC Rafferty, Director of Community Engagement at the Missouri Behavioral Health Council, for leading this effort.

Additional thanks to the individuals listed below for speaking during the SIM Summit:

**Brent McGinty,** CEO/President, Missouri Behavioral Health Council

**Katie Doman**, Behavioral Health, Treatment Court and Pretrial Services Manager, Office of State Courts Administrator

**Danielle Mason**, Behavioral Health Supervisor, Office of State Courts Administrator

Senior Judge Patricia Joyce, Judicial Engagement Coordinator

Senior Judge Roger Prokes, Judicial Engagement Coordinator

Senior Judge Gary Lynch, Judicial Engagement Coordinator

Sheriff Jason Klaus, Perry County

Judge Rebecca McGinley, Gentry County

Judge Brice Sechrest, 24th Circuit

**Ted Solomon,** Community Behavioral Health Liaison, Compass Health Network

**Jen Gentry-Tonn,** Community Behavioral Health Liaison Team Director, Family Guidance Center

Scott Breedlove, President, Landmark Recovery

Eric Stone, Substance Use Counselor

**Brenda Hargrave,** Peer Support Specialist, Family Guidance Center

## **RECOMMENDED CITATION**

Policy Research Associates. (2025). *Executive summary: Statewide summit on Missouri's 2021-2025* Sequential Intercept Model Collaboration Project. Troy, NY: Policy Research Associates, Inc.

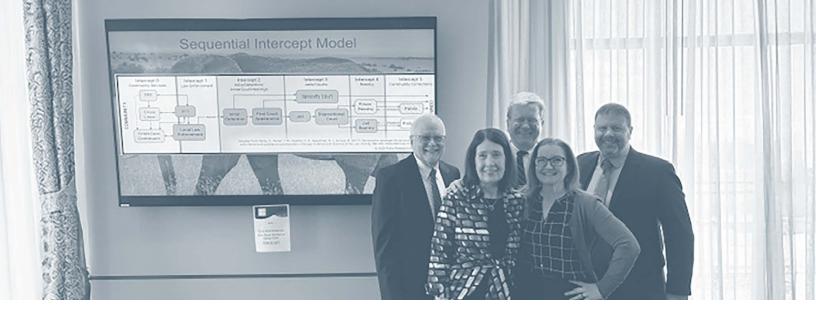

Policy Research leads the nation in driving sustainable, impactful change for people with behavioral health conditions. Ready to transform your community?

### BACKGROUND

### THE SEQUENTIAL INTERCEPT MODEL

The Sequential Intercept Model

The Sequential Intercept Model (SIM) was developed in the early 2000s by Mark Munetz, MD, and Patricia A. Griffin, PhD, with Henry J. Steadman, PhD, of <u>Policy Research Associates</u> (PRA). A national leader in criminal legal and behavioral health systems transformation, PRA provides research, technical assistance, training, and policy evaluation services for jurisdictions across the country. The SIM is a conceptual model to inform community-based responses to the involvement of people with mental and substance use disorders in the criminal legal system. PRA uses the SIM as a framework to facilitate interactive workshops with local jurisdictions interested in assessing available resources across the criminal legal and behavioral health systems, identifying gaps in services, and conducting strategic planning. During the mapping process, the community partners are introduced to evidence-based and emerging best practices from around the country. The culmination of the mapping process is the creation of a local map and strategic plan based on the gaps, resources, and priorities identified by attendees.

## MISSOURI'S SEQUENTIAL INTERCEPT MODEL COLLABORATION PROJECT

In 2021, the Missouri Behavioral Health Council (MBHC) secured a multi-year grant from the Missouri Foundation for Health to conduct SIM Mapping Workshops in all counties across Missouri. The effort was led by KC Rafferty, Director of Community Engagement at the MBHC, in collaboration with several state and national partner organizations, including PRA, the National Center for State Courts (NCSC), the Missouri Office of State Courts Administrator (OSCA), and the Missouri Department of Mental Health (DMH). The MBHC engaged PRA to provide SIM Mapping Workshop Facilitator Training and consultation to develop in-state SIM Mapping Workshop facilitator capacity and to organize the capstone SIM Summit.

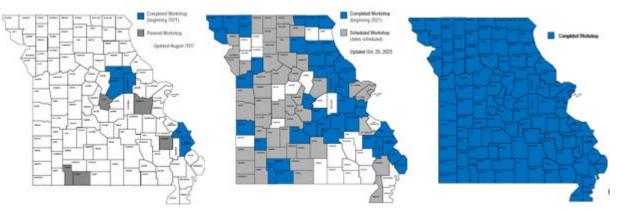

A timeline of PRA's engagement with the Missouri SIM Collaboration Project follows:

- May 2021 Virtual SIM Facilitator Training: 21 attendees
- July 2022 Virtual SIM Facilitation Refresher

Session: 20 attendees

- September 2022 Virtual SIM Facilitator Training: 22 attendees
- November 2023 Virtual SIM Facilitator Training: 23 attendees
- 2025 Statewide Summit on Missouri's SIM Collaboration Project: 80 attendees

The Statewide Summit on Missouri's Sequential Intercept Model Collaboration Project (SIM Summit) was the culmination of Missouri's 2021-2025 project to conduct SIM Mapping Workshops. Between 2022 and February 25, 2025, the MBHC organized and conducted 82 SIM Mapping Workshops, covering all of Missouri's 114 counties and the City of St. Louis, with over 4,000 total estimated attendees. The following graphics illustrate the SIM Mapping Workshop progress across three time periods: August 2022; October 2023; and February 2025, respectively.

SIM Mapping Workshop progress: August 2022; October 2023; and February 2025, respectively

## SIM SUMMIT ACTIVITIES

#### SIM SUMMIT TIMELINE

- September 17, 2024: Planning workgroup initial meeting (Missouri representatives and Policy Research Associates)
- October 2024-March 2025: Additional planning calls (Missouri and PRA)
- October 8, 2024: Summit date and location confirmed
- January 24, 2025: Save-the-date/invitation and registration link emailed
- February 28, 2025: Planning call with Missouri's Judicial Engagement Coordinators for Fireside Chat session
- March 26, 2025: Final Summit agenda and logistics emailed
- March 31, 2025: Summit at Courtyard by Marriott in Jefferson City, Missouri

SIM Summit Save the Date Invitation

The SIM Summit took place on March 31, 2025, at the Courtyard by Marriott in Jefferson City, Missouri. About 135 representatives from the 46 judicial circuits covering Missouri's 115 counties were invited. Over 80 participants, including judges and court staff, attorneys, clinicians, and other key representatives, attended the meeting (see Appendix II for full attendee list).

## SIM SUMMIT PRESENTATIONS

The Summit consisted of multiple plenary presentations, panel discussions, and a table breakout session (see Appendix I for the agenda with a full listing of presenters and presentations). The agenda was developed to highlight Missouri's successful SIM Collaboration Project, share impact and outcome data across the mappings, and provide broader context from PRA's work nationally. A summary of SIM Summit presentations follows.

#### **OVERVIEW OF STATEWIDE SIM COLLABORATION PROJECT**

Travis Parker, Vice President at Policy Research Associates, provided a brief orientation to the SIM and SIM Mapping Workshop and highlighted other similar statewide SIM Mapping Workshop efforts outside of Missouri. The Missouri Behavioral Health Council's Director of Community Engagement, KC Rafferty, then presented the history of Missouri's SIM Collaboration Project, beginning with OSCA's 2020 Leading Change sessions and the state's <u>Justice</u> <u>Reinvestment Initiative</u>.

#### WHAT DO WE KNOW? DATA GATHERED ACROSS SIM MAPPING **WORKSHOPS**

KC Rafferty and the Judicial Engagement Coordinators discussed available data and learning gathered from Missouri's SIM Collaboration Project, including statewide

gaps, resources, and top priorities. PRA's Travis Parker then compared to PRA's analysis of SIM Mapping Workshop facilitated across the country during a three-year period.

#### Sequential Intercept Model (SIM) Priorities Identified in Mapping Workshops Click or CTRL+Click to see which mappings identified each item as a priority 115 Mappings Completed (100%) Transportation Click or CTRL+Click to see which priorities each mapping identified. All rights reserved. All proprietary information contained herein is exclusively the right of the Missouri Coalition of Community Behavioral Health Centers D/B/A Missouri Behavioral Health Council

#### SUCCESSES AND LESSONS LEARNED

Brent McGinty, CEO/President of the MBHC, recognized legislators present and supporting the SIM Summit. Several state and local representatives across Missouri's criminal legal and behavioral health systems then highlighted

various successes and lessons learned from the project. PRA's Travis Parker concluded the session by providing a national perspective on post-SIM Mapping Workshop best practices.

During this session, attendees were given an opportunity to electronically contribute their own successes since their SIM Mapping Workshops, using the Mentimeter platform. Responses included:

- Enhanced collaboration/breaking down silos across stakeholders (e.g., courts, law enforcement, providers) (12 responses)
- Increased awareness and continued discussions around behavioral health issues (11 responses)
- Created/expanded jail navigator positions in adult and juvenile systems (10 responses)
- Established a cross-systems workgroup (e.g., SIM steering committee, CIT Council, Transitional Housing Coalition, a regional transportation group) (6 responses)
- Built a stronger resource list (3 responses)
- Implemented early intercept diversion (e.g., a co-responder unit, CBHL partnerships, law enforcement community resource liaison) (3 responses)
- Implemented more jail reentry services (2 responses)
- Expanded treatment courts (2 responses)
- Stronger peer integration in multiple sectors, including adding to a housing board (2 responses)
- Secured a transportation grant
- Established a successful homeless project
- Cross-trained staff
- Implemented a data sharing platform
- Developed an MOU for information sharing
- Helped public defender teams build connections

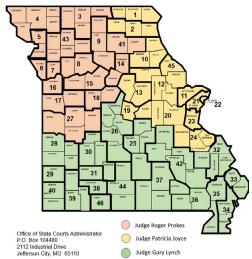

Attendees were also asked about the barriers to collaboration since their SIM Mapping Workshop. Responses included:

- Lack of time (32 responses)
- Lack of motivation/buy-in (10 responses)
- Staff turnover (7 responses)
- Lack of champions/ownership of the work (6 responses)

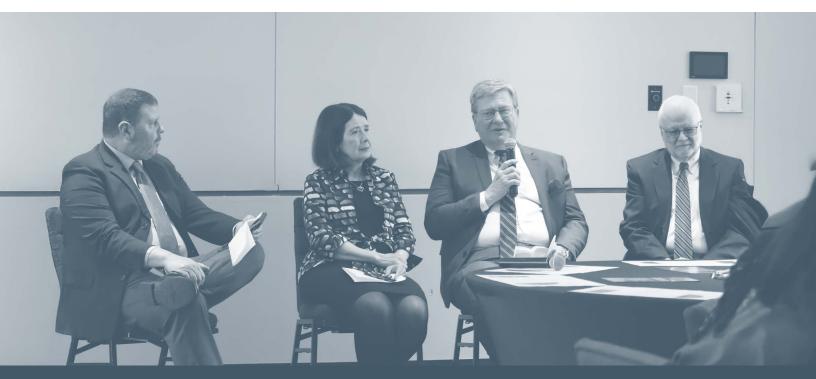

- Loss of momentum (6 responses)
- Funding (6 responses)
- Transportation (2 responses)
- Policies
- Housing
- Meeting fatigue
- Too many people to organize

#### FIRESIDE CHAT: REFLECTIONS FROM THE JUDICIAL ENGAGEMENT COORDINATORS

During the Fireside Chat, PRA's Travis Parker moderated a discussion with three Judicial Engagement Coordinators, Senior Judges Patricia Joyce, Roger Prokes, and Gary Lynch, regarding their experiences and leadership in the SIM Collaboration Project. Reflections included the impact of spending dedicated time with each local jurisdiction, the benefits of integrating individuals with lived experience (peers), comparisons and contrast across urban and rural regions, and implications for state legislation, policy, and funding.

Judicial Engagement Coordinator Representative Regions

Executive Summary: Statewide Summit on Missouri's Sequential Intercept Model Collaboration Project | 9

#### MOVING FORWARD: TABLE DISCUSSIONS AND REPORT-OUTS

Each table was instructed to discuss several prompts within their small groups, including long-term local objectives and priorities related to the SIM, identified needs and resources, potential ongoing collaboration, and takeaways and action items from the SIM Summit. Following the individual discussions, each table provided a report of their conversation to the full group.

Comments included the following:

- Continue and/or reignite collaboration from those present at the SIM Mapping Workshops
  - » Also engage additional representatives not present
  - » Brand and advertise the work and accomplishments
- Share successes and challenges across Missouri counties through peer learning
- Creatively fund and expand programs (Crisis Intervention Team training and more)
- Secure additional workforce development and training
- Highlight significant gaps, including:
  - » Transportation
  - » Additional mental health treatment beds

- Housing, specifically the use of tiny homes and need for stronger relationships with U.S. Department of Housing and Urban Development (HUD) providers
- » The criminalization of people with mental health needs
- Evaluate the expansion and utilization of 24hour Behavioral Health Crisis Centers
- Engage county commissioners, legislators, and other stakeholders, including advocating for:
  - » Opioid settlement funds
  - » Legislative changes on the Medicaid 1115 Reentry Waiver billing and medication and service array in jails
- Provide additional criminal legal/behavioral health education to:
  - » Local communities
  - » The court systems
  - » Community Behavioral Health Liaison (CBHLs)
- Explore the need to re-map jurisdictions when appropriate

"The Summit lights a fire to go back, reconvene, look at the priorities again, and reevaluate our motivation to move forward."

- SIM Summit Attendee

#### NEXT STEPS & CLOSING REMARKS

For Missouri, the MBHC's KC Rafferty and OSCA's Katie Doman and Danielle Mason provided a discussion of the project's next steps. Although the funding for the initial phase of SIM Mapping Workshops in Missouri has ended, OSCA, MBHC,

DMH, and other state agencies will continue to provide ongoing support to every jurisdiction to maintain efforts from each workshop. Travis Parker provided closing remarks on behalf of PRA's collaboration with Missouri.

### POST-SUMMIT RECOMMENDATIONS

Missouri's SIM Collaboration Project has been an impressive and impactful example of leadership and cross-system partnership. A number of exemplary state and local programs are currently being implemented to promote criminal legal and behavioral health systems change and prevent unnecessary incarceration. PRA's technical assistance and consultation with Missouri since 2021, including involvement in local SIM Mapping Workshops and the March 31, 2025 SIM Summit, inform the following recommendations.

1. If they have not yet already, it is vital that communities identify where their ongoing work will "live," ideally through a cross-systems workgroup that includes broad criminal legal, behavioral health, and community representation. To continue or re-start momentum around these issues, each jurisdiction should formalize a planning body to address the needs of justice-involved persons with behavioral health and other complex needs.

Behavioral health and criminal legal agencies have different missions and different approaches to service delivery. However, these agencies also serve a shared population that cycles through the complicated landscape of state and local criminal legal and behavioral health agencies. There is a need for ongoing dialogue, joint planning, and increasing awareness regarding system resources and diversion opportunities. Implementation of initiatives to increase these opportunities and more appropriately serve this population will require the involvement of a broad group of stakeholders with sufficient authority to impact state-, county-, and municipal-level change.

Many jurisdictions around the country have created Criminal Justice Coordinating Committees or Criminal Justice Coordinating Councils (CJCCs) to collaboratively address challenges. The State of Pennsylvania, Bexar County (Texas), the City of New Orleans (Louisiana), and Palm Beach County (Florida) are examples of counties and municipalities that have developed Criminal Justice/Legal Mental Health Planning or Advisory Committees. Mecklenburg County (North Carolina) has both a Criminal Justice Advisory Group and Community Engagement, and Opioid and Substance Use Disorder Task Forces. Whether you create a new group or enhance existing groups, it is vital to have a formal process for inter-group communication and collaboration, including a reporting flow to/from each other. Justice Management Institute's National Network of Criminal Justice Coordinating Councils provides additional resources.

The following national initiatives can inform planning efforts and provide technical assistance to enhance community collaboration:

- The National Institute of Corrections' 2022
   <u>National Survey of CJCCs</u>
- The Bureau of Justice Assistance's <u>Justice</u> and <u>Mental Health Collaboration Program</u>
- The International Association of Chiefs of Police's <u>One Mind Campaign</u>
- The Stepping Up Initiative

See also <u>Promoting Mental Health and Criminal</u> <u>Justice Collaboration Through System-Level</u> <u>Partnerships</u> (Kamin, Weisman, & Lamberti, 2022).

It is also important to identify one or more individuals who may serve as "champions" to gain stakeholder buy-in and help move this work forward. Ideally, the champion(s) should be mission-driven/goal-oriented, qualified to manage people and processes, skilled at communication, experienced at building relationships, respected by others, and committed to intervention and diversion efforts in your community. Consider designating an individual on your task force to serve as a county/state liaison or invite state office personnel to local meetings so the local concerns on key issues can be addressed at the highest levels.

The SIM Mapping Workshop report and map are designed to be living documents useful for informing ongoing meetings and supporting relevant strategic planning and funding applications. The site should also consider branding and marketing its cross-systems project to increase engagement, document outcomes, and amplify the work.

Finally, consider how current or new diversion efforts can be integrated into ongoing participation in state and national initiatives. In Missouri, these include <u>Certified Community Behavioral Health</u> <u>Clinics</u> (CCBHCs), the <u>988 Suicide and Crisis</u> <u>Lifeline</u> implementation, the <u>Crisis Intervention</u> <u>Team</u> (CIT) Council, the <u>Community Behavioral</u> <u>Health Liaison</u> (CBHL) program, and the Council of State Governments Justice Center's <u>Reentry 2030</u> and <u>Stepping Up</u> initiatives. 2.

Integrate individuals with lived expertise (peers) into ongoing and future diversionary programming efforts across local and state initiatives.

It is important to develop diversion programming inclusive of individuals with behavioral health needs and those who have been affected by the criminal legal system. Peer support has been found to be particularly helpful in easing the traumatization of the corrections process. Integrating peers who have lived experience and are in recovery, particularly with substance use disorder, has also been shown to be highly effective in encouraging individuals to engage in treatment services. Settings that have successfully involved people with lived expertise include crisis evaluation centers, emergency departments, jails, treatment courts, and reentry services.

Please explore the two-page resource developed by Policy Research Associates, <u>Peer</u>. <u>Support Roles Across the Sequential Intercept</u> <u>Model</u>, which explains how peers can be used at each intercept. It also includes examples of sites across the country where peer involvement has successfully been used. The Bazelon Center for Mental Health Law's <u>When</u> <u>There's a Crisis</u>, <u>Call a Peer</u> outlines how people with lived experience make mental health crisis services, in particular, more effective. Two specific program examples are <u>People USA</u> (formerly PEOPLe, Inc.) in upstate New York and <u>Keya House</u> in Lincoln, Nebraska. Both operate peer-run hospital diversion homes with lengths of stay of generally a few days. The homes are designed for crisis management to divert emergency room visits and maintain community independence. Mental Health Association of Nebraska also operates <u>Honu Home</u>, a longerstay respite (up to 90 days) designed for individuals transitioning back to the community from state corrections.

Other communities have integrated peers and case managers into mobile crisis response, <u>opioid overdose prevention</u>, and initiatives around outreach to those frequently engaging with law enforcement, hospitals, and jails. Some peer staff work specifically in local VA hospitals to help engage veterans in reentry services and fill basic needs, such as transportation. Philadelphia's Department of Behavioral Health and Intellectual Disability Services has created a helpful <u>Peer Support Toolkit</u>.

## 3.

At all stages of the Sequential Intercept Model, gather data to document the flow of people with behavioral health needs through the local criminal legal system and enhance cross-agency information sharing.

Improving cross-system data collection and integration is key to identifying frequent contact populations, justifying program expansion, and measuring program outcomes and success. It is important for each organization to define terms initially, so a common definition of what populations/issues communities and organizations are trying to understand is developed. Learn from each system how that data point is collected, coded, and stored. Seek common identifiers to match populations. Creating a data match with information from local/state resources from the time of arrest to pre-trial can enhance diversion opportunities before and during the arraignment process. Data collection does not have to be overly complicated. For example, some 911 dispatchers spend an inordinate amount of time on comfort and support calls. Collecting information on the number of calls, identifying the callers, and working to link the callers to services has been a successful strategy in .other communities to reduce repeated calls. In addition, establishing protocols to develop a "warm handoff" or direct transfers to crisis lines can also result in directing calls to the most appropriate agency and result in improved service engagement.

Consider convening a work group to clarify datasharing goals for the community. Examples of goals might include:

- Track key criminal legal and behavioral health trends across the jurisdiction to inform policy, planning, and funding.
- Identify people cycling through jails, emergency rooms, and crisis services and develop new plans for engaging them in community care.
- Improve continuity of care for people who are justice-involved upon return to the community.

Dashboard indicators can display the prevalence, demographics, and case characteristics of adults

with mental and substance use disorders who are being arrested, passed through the courts, booked into jail, sentenced to prison, placed on probation, etc. A mental health dashboard can also be developed to monitor wait times in hospitals for people in mental health crises and transfer times from the emergency department to inpatient units or other services to determine whether procedures can be implemented to improve such responses. These dashboard indicators can be employed by a county planning and monitoring council to better identify opportunities for programming and to determine where existing initiatives require adjustments. St. Louis can build on existing dashboards and data collection by associating cost savings and avoidance with diversion programs.

See more from the Arnold Foundation and National Association of Counties (NACo)'s <u>Data-Driven Justice Initiative</u> (DDJ). The publication "<u>Data-Driven Justice Playbook: How to Develop</u> <u>a System of Diversion</u>" provides guidance on development of data driven strategies and use of data to develop programs and improve outcomes. SAMHSA's <u>Data Collection Across the Sequential</u> <u>Intercept Model: Essential Measures</u> details recommended data elements organized around each of the six intercepts represented in the SIM.

### 4.

## Increase and improve transportation options, particularly for individuals with behavioral health needs.

A common and under-addressed gap across most of the mapped counties is access to transportation, especially for justice-involved individuals. Distance is a significant barrier to outpatient treatment and may "force" individuals into a higher level of care than needed, such as residential treatment, or increase treatment wait times. This not only impacts access to health care but also potentially impacts criminal legal outcomes. Transportation by law enforcement can also be traumatic, particularly for individuals experiencing mental health crises (see The Wilson Center for Science and Justice's <u>Changing the</u> <u>Route: Seeking Compassionate Alternatives to</u> <u>Police Transport in Involuntary Civil Commitment</u> for related recommendations). There are many examples of local communities collaborating with interested stakeholders to improve access to transportation as well as improving coordination and expansion of State <u>Non-Emergency Medical Transportation</u> (NEMT) programs, including the Wisconsin Department of Health Services <u>BadgerCare Plus</u> program and Colorado's <u>Secure Transport</u>.

The Ohio Association of County Behavioral Health Authorities published a "White Paper: Criminal Justice and Behavioral Health Care, Housing, Employment, Transportation and Treatment." The White Paper describes three transportation initiatives:

 The NET Plus initiative in Wood County, Ohio. The NET Plus program coordinates transportation resources for Medicaideligible populations and funds transportation for non-Medicaid-eligible populations. The service provides ADA-accessible nonemergency transportation to medical, dental, vision, pharmacy, mental health, and addiction treatment appointments/services.

- The Hardin County Volunteers in Police Service (VIPS) initiative, operated by the Sheriff's Department, provides volunteer transportation to essential services for Recovery Court clients.
- The Franklin County Turn It Around Transportation & Re-development Services provides transportation for workers to various employers. The program is funded by self-contribution, payroll deduction, and/ or employers.
- Additional resources include:
  - » <u>Non-medical transportation services</u> provided by counties and states (NCSL)
  - » <u>New Ride CARE Law Changes Emergency</u> <u>Detention Transportation Regulations -</u> <u>Oklahoma Counseling Institute</u>
  - » Policy Research Associates' article <u>Transportation after Incarceration:</u> <u>Where the Rubber Meets the Road for</u> <u>Sustainable Reentry</u>

## APPENDIX III: Missouri SIM Summit Evaluation Summary

PRA conducted a voluntary onsite evaluation survey at the end of the SIM Summit. A summary of survey results follows (N=23):

- 1. Across evaluation respondents, 96% reported they were "very satisfied" (74%) or "somewhat satisfied" (22%) with the **summit process**.
- 2. When asked whether "the summit significantly increased your knowledge in areas relevant to your work," 43% and 48% reported "strongly agree" and "agree," respectively.
- 3. When asked "to what extent has the summit **improved your community's capacity to provide effective behavioral health treatment services**," 35% reported "a great deal" and 43% reported "somewhat."
- 4. When asked "to what extent will you **make changes to your work or your staff's work** as a result of the summit," 17% reported "a great deal" and 78% reported "somewhat."
- 5. When asked, "to what extent will the workshop strengthen your behavioral health treatment system," 35% reported "a great deal" and 57% reported "somewhat."
- 6. The survey asked, "How has the summit strengthened your community's behavioral health treatment system?" Responses included:
  - motivation to regroup, increased collaboration and communication, engaging the court system in mental health efforts, expansion and increased utilization of CBHLs and BHCCs, and cultural change.
- 7. The survey asked, "What barriers do you anticipate might delay or impede continuation of this work in the future?" Responses included:
  - lack of time/workforce, competing priorities, stakeholder engagement, partner's willingness to make changes, system/partner silos, judge turnover, insufficient funding, county buy in, transportation gaps, and possible removal of support from the federal government.
